Group Art Unit No.: 1648
Class-Subclass 424-192100

REMARKS

In reviewing this application after they received the Notice of Allowance dated July 28, 2003, the Applicants noticed they had did not file an Information Disclosure Statement for a few references mentioned in the declaration filed by Catherine Gerard on January 28, 2002, and a previous response filed by the Applicants on June 28, 2001. In addition, Applicant's would also like to acknowledge the Examiner's amendment to the Title of Invention from "*Vaccine*" to "*Composition Comprising Human Papilloma Virus Proteins and Fusion Proteins Adjuvanted with A CPG Oligonucleotide*". However, the Applicants assert that they want to change the Examiner's amendment filed on January 15, 2003, wherein "influenzae" was replaced with "influenza" in claims 1 and 15. The proper spelling of the genus and species is *Haemophilus influenzae*. The correct spelling is now reflected in the amended claims 1 and 15, and the sequence listing.

The Applicants also re-submit a signed declaration by Catherine Gerard in order to clarify a few citations contained within.

For the completeness of the Applicants' file, they respectfully request continued examination so that Examiner Li may consider the references in the PTO-1449 Form if appropriate and enter the typographical errors as described herein. No new matter is introduced by the above request.
